

MILLEN • 

DEADMILL LANE, BATH

Located in the Green Belt adjacent to the World Heritage Site of Bath City is our affordable housing scheme for 15 new homes. The site is enclosed on 3 sides by existing development and is well located for all local facilities reducing the reliance of cars for transport. Seeking to make these properties affordable in all aspects we have looked at ways to reduce energy consumption on the dwellings with solar panels, air source heat pumps and ICF construction. The Local Authority has a enormous need for affordable homes and delivering these homes will help meet that need.
